

# Smart [PRO] 2.0

**Smart [PRO] 2.0** is the ideal solution for efficient lighting and relamping of indoor and out door sports facilities and large areas. The new range includes LED floodlights able to replace traditional sources from 250W to 1000W HID, with a luminous flux up to 38,000lm.

## The exclusive features of Smart [PRO] 2.0

### Modular

**Smart [PRO] 2.0** is designed to adapt to different applications and installation needs, with a wide choice of various light and optic packages.

### Efficient

Compact design and installation ease, together with dimming options available on request (1-10V and DALI), enable energy optimisation.

**Smart [PRO] 2.0** is the best solution for new and relamping projects of indoor and outdoor sport facilities.

### High performance

**Smart [PRO] 2.0** great performance comes from a range of several, fundamental choices such as the use of latest-generation LEDs and the mechanical studies carefully carried out once designing the system.

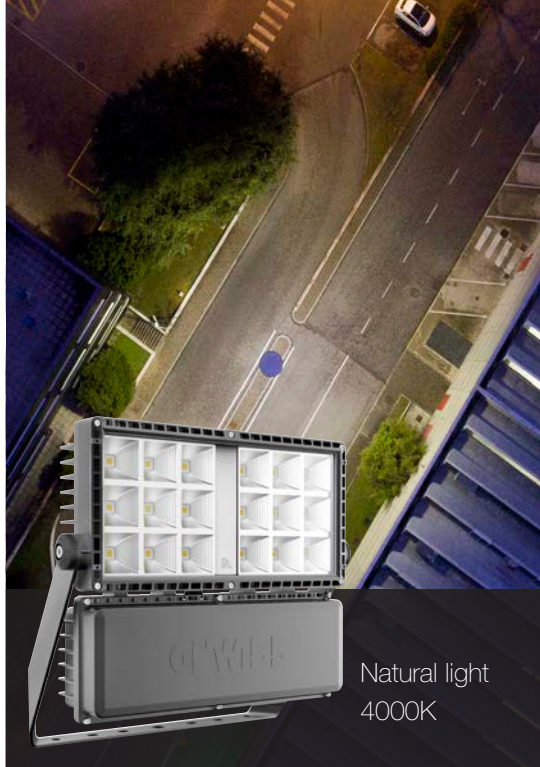

### Reliable

The Italian design and the careful selection of materials ensure total reliability, stability and solidity for all **Smart [PRO] 2.0** solutions.

Cold light  
5700K

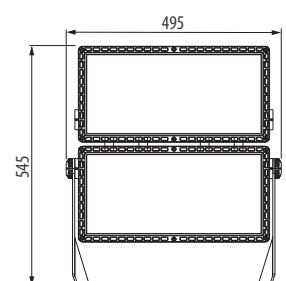

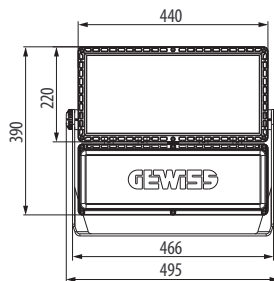

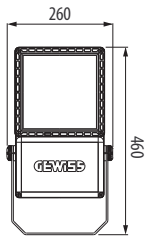

Natural light  
4000K

Warm light  
3000K

## Technical characteristics

- Ta from -25°C to +50°C
- Lifespan: L80B10 > 100,000h
- Overvoltage protection >6KV

## Application areas

### Outdoor application areas

- High masts
- Airports and hangars
- Street intersections
- Freight terminal stocking areas
- Outdoor parking areas

### Indoor and outdoor sports facilities

- Stadiums
- Football fields
- Volleyball, basketball and tennis courts
- School gyms

## Technical plus

## Available optics
