TOC ODB 68

**Fiber Optic Distributor IP68** 

### **Reliable protection in harsh environments.**

Whether cabling infrastructure for buildings or FTTH networks, whether mobile communication or industrial applications, whether security installations or smart grid – the small, robust distributor TOC ODB 68 protects fiber optic connections in harsh environments in indoor and outdoor applications. The strong, space-saving housing is UV stable and offers water and dust protection according to IP68. It can be installed on walls and ceilings, in floors and on poles. The round housing makes sure the minimum bending radius of the cable slack is maintained and offers additional space for couplers, attenua-

tors and splitters in WCM and FTTH networks.

The TOC ODB 68 is available as a splice case with splice cassettes and as a distributor for pre-assembled TICNET ready-to-install fiber optic links. The version for the TICNET links comes with two special cable glands for torsion-free, dust and water-tight entering.

As a universal product solution, the innovative TOC ODB 68 offers the versatility and flexibility needed in modern fiber optic networks.

# Designed to make things simpler for pre-assembled solutions: the TICNET configurator

The TICNET configurator is a convenient and quick way of ordering preassembled cabling components from the factory. Just follow six simple steps to order the product you need:

1 Select Type of product
2 Define product
3 Check final product
4 Add product to shopping basket
5 Enter address details
6 Send inquiry

Whether you need copper or optical fiber products, cables or patch panels, solutions for office buildings, data centers, industrial facilities or home networks: the TICNET configurator service is available around the clock to inquire customised products. Naturally it is also possible to save your configurations.
